

FREE ONLINE ALZHEIMER'S SUPPORT GROUP

If you or a loved one suffers from Alzheimer's, Early Onset Alzheimer's, or another Dementia related disease, if you are an advocate, or want to know more about these diseases, we invite you to join us. **Memory People™** is a Facebook group founded by Rick Phelps who was diagnosed with Early Onset Alzheimer's Disease June of 2010. Rick saw the need for real time interaction for all those touched by these diseases.

At Memory People™, you will find care and support in a comfortable and safe environment where patients, caregivers, and all involved come together to share our stories, support each other, and bring awareness to these diseases.

First, you will need to have a Facebook account to join us. From your Facebook home page, type "Memory People™ " into the search bar. Then click on Memory People™, and you will be taken to our home page where you can read about us. Then, just click on the "Join Group" button and one of our Administrators will add you.

If you or a loved one has been touched by Alzheimer's or another Dementia related disease, we encourage you to join us, at **Memory People™**.

..bringing Awareness, one person at a time..
